Work with Trauma Details and Surveys – Emergent Event

Document Trauma Details

- Click the **Document** button.
The **Trauma Details** component opens.

- Note: The **Performed Date/Time** field auto-populates the current date and time.

- Click a response in a section.
The response displays in blue.

- Note: To toggle off a response, click the response again.
- To document the current date and time in a section, click the **Document** button.
 Note: Alternatively, click the calendar icon (📅) to document a specific date and time.
- Some fields accept numeric values only. Click in the field to document.

Work with the Vital Signs component – Emergent Event

Add vital signs using Bedside Medical Device Integration (BMDI)

Note: Vital signs will not populate in the Emergent Event workspace if the patient is not admitted and associated to the applicable bedside monitor.

1. Click the **BMDI Devices** field.
 
2. A list of available devices displays.
3. Click the applicable device from the list.
4. Click the **Auto** button.

Vital signs will automatically populate based on a set interval.

Note: To document current vital signs, click the **Doc** button. Vital signs entered through BMDI display in purple and have buttons under the **Action** column. Available buttons include **Accept** (✓) and **Decline** (✗). Only accepted vital signs will appear in the note and save to the chart.

Click on a row to modify the results manually.

Add manual documentation

1. Click the **Add** button.

The **Add – Vital Signs, Pain, GCS** context/view detail page opens.

2. Click the applicable tab(s) and document the details.

Note: The Glasgow Coma Scale will automatically calculate based on **GCS** documentation.
3. Click the **Save** button.

Work with the Orders Component – Emergent Event

Orders component overview

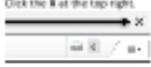

- Refresh icon
- Add button
- Reorder button
- Cancel/Discontinue button
- Order Actions button

Important: Completing a task using the Order Actions button does not document the task on the MBS.

Add order

- Click the  button.
The **Orders** responsive-view detail pane opens.
Note: To view a list of available quick order pages (i.e., **Adult** and **Pediatric Trauma Resusc Orders**), click the **down-pointing arrow** at the top left. Click the applicable option from the list.

- Click the applicable order(s) and document the details.
- Click the **X** at the top right.

The responsive-view detail pane closes.
